SUPPLEMENTARY INFORMATION:

I. Abstract: The purpose of this project is to assess if National Park Service (NPS) visitors, as well as visitors to other public lands, are benefiting from an interagency

partnership, known as Earth to Sky, by measuring awareness and understanding of global climate change in visitors to NPS and other public land locations. An on-site survey will be administered to park visitors to assess their awareness and understanding of global climate change; meaning of and connection to park resources; and perception of trust in sources of information regarding global climate change. Data will be collected in a variety of NPS and other sites. Results will help NASA and other managers of the Earth to Sky partnership assess the success of the partnership efforts and help refine and encourage the continued collaboration.

II. Method of Collection: An on-site survey will be administered to visitors in order to collect the data.
